Sponsored by

19 SEPTEMBER 2018 SYDNEY

- ✓ Covering from asbestos discovery on site to methods for asbestos disposal
- ✓ Navigating the regulatory maze on asbestos and asbestos waste management
- ✓ Linking WHS, Contaminated Land, Site Management and Occupational Hygiene
- ✓ Communicating the risk-based approach is the better approach

This seminar's aim is to:

- Identify efficient management of asbestos on sites and prepare for its management and removal
- Consider cost effective approaches to asbestos remediation
- Investigate impacts of asbestos on recycled materials

Speakers represent a broad cross section of disciplines, which have a role to play in asbestos management, along with the main regulators to provide a holistic view of asbestos management in NSW. The seminar will also discuss emerging issues with the management of asbestos waste and asbestos containing materials including:

- Asbestos waste issues – definitions, enforcement, available disposal services and transport and costs – including the new POEO Waste Regulations amendments on C&D recycling
- Management of ACM and asbestos impacted contaminated soils with under contaminated site requirements
- Recent court case impacting on liabilities in finding asbestos in reused soils
- Leaving asbestos on a contaminated site → capping and clean up requirements
- Definitions of what constitutes *asbestos free material* especially for recycled materials
- Current and proposed planning requirements for asbestos site remediation
- Providing the community with confidence that proper asbestos management will minimise risks

With the combination of the various disciplines, rule makers and other concerns, this seminar seeks to improve NSW's approach to asbestos management.

This seminar is supported by Norton Rose Fulbright and Hibbs & Associates.

Details at a glance

Date: 19 September 2018
Time: 8:55 am – 4:40 pm; Registration from 8:40 am
Venue: NRF Rooms, L10, 44 Martin Place, Sydney

PROGRAM
