

Wastewater Systems Design & Management Workshop

Brought to you by:

Sponsored by:

7 NOVEMBER 2019

Is your wastewater treatment plant operating well?

Do you need staff training in this area? Do you want to cut the costs of running your plant?

Have you recently installed new equipment?

Many companies need to operate and manage their wastewater treatment systems to remain in compliance and reduce high costs associated with sewage and waste disposal. To help sites better manage their wastewater systems this workshop takes you through the range of processes and regulatory requirements needed to select and operate your wastewater system at its optimum level. This course covers:

- ✓ Overview of Sydney Water's Trade Waste policy and agreement processes
- ✓ Discharge limits and approaches under Environment Protection Licences
- ✓ Upstream focus on cleaner production and reducing the load on the treatment plant
- ✓ An in depth look at a Sydney Water Tradewaste Agreement
- ✓ **Treatment systems covered**
 - **Preliminary Treatment** → Screening and balancing
 - **Physical separation:** → Dissolved Air Flotation, filtration, settling systems, dewatering, screening, filtration, RO and management of sludge etc.
 - **Biological:** → The process of BOD reduction using activated sludge, anaerobic versus aerobic
 - **Chemical treatments:** → Understanding coagulants and flocculants, filter aids etc.
- ✓ Solid and liquid waste management and costs and how to reduce them

Details at a glance

Date: 7 November 2019 – Lidcombe
Time: 8:30 am – 5 pm; Registration from 8:20 am.
Venue: Doolyes Club, Church Street, Lidcombe

WASTEWATER SYSTEMS DESIGN AND MANAGEMENT - AGENDA

8:20 am	<i>Registration and Coffee</i>	
8:30 am	Welcome and Introduction	ASBG
8:35	Overview Of Trade Waste Policy — sewer limits and changes to Sydney Water's standards including proposed charge rates e.g. BOD increases	Sydney Water Andrew Doig, ASBG
9:15	Other regulatory issues , limits and legal processes involving waste water and its by-products	James Hall,
9:45	The Major Costs of Treating Wastewater: A look at the main costs of treating water including an overview of a Sydney Water Tradewaste Agreement	Director Hydroflux Industrial
10:30	Morning coffee and Networking	
10:50	An Introduction to Wastewater Treatment – A review of the four fundamental process steps of industrial water treatment and what each achieves.	Mitch Hastings, Hydroflux Industrial
11:30	Preliminary Treatment - What is preliminary treatment and why is it important? A look at the two main process steps used to undertake preliminary treatment.	Matthew Pugh, Director, Hydroflux
12:00	Lunch	
12:45	Primary Treatment Overview – Why do primary treatment? Learn the secret to making it work effectively, including a discussion on primary treatment chemistry.	Bruce Willis, Hydroflux Utilities
1:00	Primary Treatment Equipment - Dissolved Air Floatation and clarifiers explained	Mathew Pugh
1:50	Secondary Treatment – What it does and how it works. Aerobic vs anaerobic	Bruce Willis
2:20	Tertiary Treatment Process --. – Filtration, disinfection and reverse osmosis	Mitch Hastings
3:05	Afternoon Tea	
3:25	Sludge Management – dewatering options to reduce offsite disposal costs	James Hall
4:00	WORKSHOP - Participants are invited to bring their own wastewater treatment plant problems along and have them analyzed by our team	All
5:00	Close	

PRICE (incl GST)	VENUE	DATE
ASBG members and Hydroflux clients and supporters \$395 Non-Member \$495 E-notes, morning tea is included in the package	Dooleys Club Church Street LIDCOMBE	7 November 2019 8:30 am to 5:00 pm
