20 AUGUST 2019

SYDNEY

- ✓ How much asbestos stock is left and when should it be removed?
- ✓ Navigating the recent regulatory changes on asbestos waste management
- ✓ Linking WHS, Contaminated Land, Site Management and Occupational Hygiene

This seminar's aim is to:

- New legislative changes to asbestos waste laws, policies and legal interpretations
- Identification of asbestos stocks and flows of asbestos materials, where does it go?
- Consider cost effective approaches to asbestos remediation
- Impact of new NSW laws on asbestos waste management
- Investigate impacts of asbestos on recycled materials and disposal methods

Speakers represent a broad cross section of disciplines, which have a role to play in asbestos management, along with the main regulators to provide a holistic view of asbestos management in NSW. The seminar will also discuss emerging issues with the management of asbestos waste and asbestos containing materials including:

- Asbestos waste issues – definitions, enforcement, available disposal services and transport and costs
- Legal impacts of the new POEO Act and Waste Regulations amendments on asbestos
- Management of ACM and asbestos impacted contaminated soils with under contaminated site requirements
- EPA v Grafil appeal case impacting on liabilities in finding asbestos in reused soils
- Leaving asbestos on a contaminated site → capping and clean up requirements
- Definitions of what constitutes *asbestos free material* especially for recycled materials
- Current and proposed planning requirements for asbestos site remediation
- How much asbestos materials are left in building stock and when should it be removed?

With the combination of the various disciplines, rule makers and other concerns, this seminar seeks to improve NSW's approach to asbestos management.

This seminar is supported by Maddocks and Hibbs & Associates.

Details at a glance

Date: 20 August 2019
