CLAYTON UTZ

SYDNEY – 12 DECEMBER 2019

This seminar will assist contaminated landowners, environmental professionals based in industry and new entrants to environmental management on recent changes and developments in the contaminated land management.

A number of regulatory and policy changes are arriving with implications including:

- Draft Consultants Reporting Guidelines the new 7 Stages - up from 4
- Remediation of Land SEPP → What's emerging from DPIE's review
- Line in the sand → When does waste and pollution law overtake contaminated land law?
- Forced acquisition of contaminated land; a new tool for Government?
- Costs of remediation and its variations
- Bromated fire retardants; are they the new PFAS?

Also discussed are the ongoing emerging pollutants of PFAS, asbestos and bromated fire retardants and the issues they bring to contaminated land management. This seminar will cover:

- ✓ UPSS Regulation's new application to existing environment licence holders sites
- ✓ EPA v Grafil case → Impact of waste laws on remediation and unexpected finds
- ✓ The Pasmenco Cockle Creek acquisition process
- ✓ The Stockholm Convention listed POPs – emerging contaminants
- ✓ Managing contaminated PFAS and asbestos soils under NSW's waste legislation
- ✓ When is it better to leave the contaminants in the ground or dispose of them?
