1.2 hour – Webinar 16 February 2023

POEO (Clean Air) Regulation 2022 - Major Tightening of Your Air Emissions

This webinar will overview the new POEO (Clean Air) Regulation 2022 (CAR) significantly tightens of air contaminant emissions from existing stacks and other sources. CAR will sunset the Group 3 & 4 limits (air pollution equipment build before December 1997) to move to Group 5 then Group 6 limits. For example:

- If your boilers were installed before August 1997, you may need to replace them
- Air pollution equipment of this age will need to be upgraded
- Fuel burning equipment this old may require major modifications
- Emissions under Group 4 would need to improve from ~250 mg/m³ Suspended Particulates, (SP) to 50 mg/m³ SP, under Group 6.

The only way to avoid upgrading to new air pollution equipment is apply to the EPA for a Legacy Condition, but you only have about 2 years to apply if you have an EPL. There are many other changes to tanks, motor vehicles etc.

ASBG and many others showed the cost benefit in the supporting Regulatory Impact Statement was flawed, grossly underestimating the costs to industry by many factors. It has been removed from the EPA website. ASBG is running this webinar to inform NSW Environment Licence Holders what are the consequences of the new CAR and how this interleaves with the EPA's *Climate Change Mitigation and Adaptation Plans* which are being developed.

All Environmental Managers, etc will need to quickly assess the impact of the CAR 2022, especially assessing

if their sites require: new boilers, particulate air filters or other new equipment or processes etc. Cost of such replacements will need to be assessed with the cost of application of legacy controls, assuming these will be successful with the EPA. Slides of the webinar will be issued to attendees.

Details at a glance

Date: 16 February 2023

Time: 10:55 am to 11:10 pm

Venue: Webinar using Crowdcast

PROGRAM

Review of the new POEO (Clean Air) Regulation 2022 and its impacts

Session

- ✓ Introduction – How CAR works
- ✓ Groups 1- 6 and their meaning
- ✓ Sun setting of Groups 3 & 4 to Groups 5 then 6
- ✓ Ramifications for sites with processes and air pollution controls pre August 1997
- ✓ Use of Legacy Conditions – need a good cost based argument
- ✓ The Regulatory Impact Statement and its errors
- ✓ Other Cost-benefit studies on air pollution
- ✓ Overlap with the proposed Climate Change Mitigation and Adaptation Plans
- ✓ Process and air pollution costs changes and options
- ✓ Summary

PRICE (incl GST)

ASBG member	\$45
Non-Member	\$55
Notes, will be emailed to participants on completion and a certificate	

WEBINAR

A Website link will be issued with password
Require computer with internet download speed of > 5 Mbs

DATES AND TIME

Click here to register online More information ph 02 9453 3348

Or scan and email to asbg@asbg.net.au

The Webinar series will be recorded for later viewing at your leisure

All participants will receive:

- ✓ A pdf version of the presentation slides
- ✓ Attendance certificate to gain CPD points if requested
- ✓ Tax invoices or tax invoice receipts provided

Cancellation: If you are unable to attend, a substitute delegate from your organization is welcome at no extra charge. No refunds for cancellations closer than 3 working days from the event no refunds can be made, but notes will be forwarded by mail following the event.. Cancellations must be received in writing to be recognised. A **Tax Invoice** is issued on registration with **confirmation** provided one week prior to the course. ABXSz
